

WDO Loss Control

Complete Termite Treatment documentation creates a defensible file to respond to claims and suites. Termite documentation such as contracts, annual inspection records and treatment graphs are required for insurability by your policy. A complete termite contains:

1. All treatment agreements/contracts
2. Initial treatment graph and/or application records
3. Inspection graphs (updated annually from prior year)
4. Customer correspondence: letters, phone notes, texts, emails
5. Notices of non-renewal
6. Annual renewal inspection notices
7. Related WDIRs performed for the structure under contract

For document samples and questions about your WDO operation, contact:
